

Pricing Sheet 2025 Q4

Kognitive Networks delivers a unified SaaS ecosystem for *Everywhere Networks*, combining LEO satellite, 5G, and terrestrial connectivity with cloud-managed cybersecurity, operational visibility, intelligent policy control, SD-WAN, and connectivity monetization.

Konnect and **Orbit** form the two core product families — operating independently or together — unified by **Kognitive Cloud**, the management fabric that connects, secures, and orchestrates the entire ecosystem.

Konnect™

Konnect delivers software-defined networking that adapts to the modern wireless-first enterprise

- ✧ **KonnectOpen**
ARM-based edge router with Wi-Fi integration for cost-effective, rapid deployment
Hardware Options: RS400, RS200
- ✧ **KonnectOS**
Full-featured edge router for remote and mobile sites, with advanced routing and security
Hardware Options: ES110, ES120, ES511, ES520, VX100
Virtual image: VX100
- ✧ **KonnectHub**
Secure traffic aggregation in public/private cloud for VPN routing and regional internet drop-off
Virtual image: VH100

Orbit™

Network control and monetization in a single cloud-native environment

- ✧ **OrbitPlans**
Starlink-optimized platform for pooled plan and terminal management, with extensibility for other networks.
- ✧ **OrbitBills**
Billing and analytics add-on for invoicing and profitability reporting

License Tiers

Essential

Plug-and-play networking with secure remote access for small sites and simple deployments

Standard

Cloud-managed SD-WAN with cloud-managed firewall and static bandwidth bonding for greater resiliency and performance

Enterprise

Enterprise-grade SD-WAN with dynamic bandwidth bonding, Next-Gen Firewall (NGFW), Point to Point VPN, and advanced traffic shaping

Enterprise Plus

Advanced SD-WAN with all the Enterprise level features, plus enhanced options like IDS/IPS
