

CaptivePortal

Secure, Seamless, and Profitable Connectivity

Connectivity is an asset. Businesses can monetize, manage, and optimize multi-user internet service with Kognitive Networks' **Captive Portal and Payment Gateway** solution. Designed for shared networks in maritime, hospitality, transportation, and enterprise settings, this flexible platform provides self-service internet access, usage metering, and enterprise-grade security to both control and capitalize on connectivity.

Maximize Fair, Efficient Use of Limited Bandwidth

Make subscription plans work for you. Users create Identity Access Management (IAM) accounts when logging in, selecting from custom plans that define speed and data limits. A Next-Generation Firewall (NGFW) enforces security, filtering content to maintain network integrity and safeguard operational traffic. Site-level data policies ensure that critical operations always have bandwidth priority while preventing overage fees—keeping your network both profitable and efficient.

Seamless User Onboarding & Self-Service

Self Sign-Up & Authentication – Users register independently, with admin approval options

Subscriber Self Top-Up – Users monitor usage and purchase additional data on-demand

Advanced Traffic & Bandwidth Optimization

WAN Prioritization & Bandwidth Bonding – Maximize speed, optimize costs, and prevent overages

Traffic Policy Control – Restrict or prioritize domains, services, and content dynamically

Flexible Plan & Payment Options

Custom Plans and Reports – Time-based, data-based, or tiered access plans with detailed reports make accountability and billing a breeze

Integrated stripe Payments* – Passthrough payment gateway for simplified billing and profit sharing

* requires additional license and setup

Cloud-Managed Control & Analytics

Monitoring & Automated Quota Enforcement – Prevent excessive usage while maintaining premium service

Remote Management & Zero-Touch Deployment – Deploy and Troubleshoot remotely; ideal for distributed and mobile locations

Transform Connectivity into a Lucrative Asset
