Kognitive Networks Inc. signs Multi-Year Strategic Partnership Agreement with KVH Industries, Inc.

Chicago, IL – Kognitive Networks Inc. is pleased to announce a long-term strategic partnership with KVH for deployment of its network management software. KVH will integrate Kognitive’s suite of enterprise-grade network and bandwidth management tools into KVH’s mobile communication service offerings. Kognitive’s cloud-managed SD-WAN, network security, and real-time analytics technology will become an integral element of KVH’s multi-orbit, multi-channel marine communication solutions.

“We are incredibly excited about this new chapter with KVH and their leading hybrid connectivity solutions,” says Anand Chari, Chief Executive Officer of Kognitive Networks. “This agreement affirms our commitment to crafting solutions that harmonize network performance and security with ease of use.”

As a result of this agreement, Kognitive is well poised to expand its reach and influence. With the potential to support KVH’s more than 7,000 deployments, in addition to the growing deployments of Kognitive’s existing 25+ maritime resellers and customers, the adoption of Kognitive’s network management platform will have a pronounced effect on the maritime industry and beyond.

“We are thrilled to be working with Kognitive Networks to deliver robust maritime network and bandwidth management for shipboard operations, crew, owners, and guests over the KVH ONE® global hybrid network,” explains Chad Impey, Senior Vice President of Global Sales. “This innovative technology enables us to seamlessly integrate the communication channels found aboard commercial and leisure vessels, including 5G/LTE, VSAT, Starlink, Wi-Fi, Ethernet, and more using advanced network management tools both on virtual machines on our fielded equipment as well as within a compact belowdeck appliance.”

About Kognitive Networks

Kognitive Networks (formerly K4 Mobility) is revolutionizing network management by bringing Software-Defined Wide Area Networking (SDWAN) and Secure Access Service Edge (SASE) technologies to a broad array of industries and use cases. Targeting enterprises that have many locations and require seamless communication, Kognitive Networks provides a software-first, wireless-aware approach to optimizing connectivity across multiple networks, including LEO/GEO satellites and multi-carrier 4G/5G cellular networks. The integrated security features, connectivity controls, and unified system management enable enterprises to take advantage of the evolving wireless landscape to rapidly scale their business and network operations while reducing operating and technology expenses.

About KVH Industries, Inc.

KVH Industries, Inc. is a global leader in mobile connectivity and maritime VSAT delivered via the KVH ONE network. The company, founded in 1982, is based in Middletown, RI, with research, development, and manufacturing operations in Middletown, RI, and more than a dozen offices around the globe. KVH provides connectivity solutions for commercial maritime, leisure marine, military/government, and land mobile applications on vessels and vehicles, including the TracNet, TracPhone, and TracVision® product lines, the KVH ONE OpenNet Program for non-KVH antennas, AgilePlans® Connectivity as a Service (CaaS), and the KVH Link crew wellbeing content service.
